Roger Vilà

Senior Backend Engineer

Cloud & distributed systems

Remote roles | Sitges (Barcelona), Spain | CET / CEST
rogervila@me.com | +34 666 148 225
rogervila.es | github.com/rogervila

PROFILE

Senior backend engineer with **12+ years of experience** building cloud-native systems, secure REST APIs and event-driven architectures. Hands-on expertise in **PHP, Python, Java, AWS and Cloudflare**, spanning legacy modernisation, microservices and production reliability. Led **remote engineering teams across Europe and Asia**, with a focus on technical mentorship, code quality and dependable delivery.

TECHNICAL SKILLS

Backend: PHP (Laravel, Symfony); Python (FastAPI, Flask); Java
Cloud & containers: AWS; Cloudflare; Docker; Kubernetes
Data & messaging: MySQL; PostgreSQL; MongoDB; Redis; Apache Pulsar; AWS SQS; Redis Pub/Sub
Delivery & reliability: Jenkins CI/CD; SonarQube; Grafana; Datadog; ELK Stack; incident response
Additional technologies: JavaScript; TypeScript; Node.js; React; Vue

PROFESSIONAL EXPERIENCE

Senior Software Developer | InfoPro Digital Automotive
Sep 2024 - Present

- **Reduced technical debt and production incidents by 20%** through systematic refactoring, stronger test coverage and improved deployment practices.
- Modernise legacy Java and PHP SaaS APIs on AWS and Cloudflare, integrating data from multiple providers.
- Manage incident triage, resolution estimates and structured postmortems to improve production reliability.
- Mentor junior developers and conduct code reviews to strengthen backend engineering practices.

Tech Lead | Wivapp.com
Feb 2024 - Sep 2024

- Led development of a new restaurant product from scratch, building and maintaining a scalable MVP.

Senior Backend Developer | Convelio
May 2022 - Feb 2024

- Designed secure PHP APIs for high-volume enterprise logistics, **maintaining a 99% SLA**.
- **Removed 10,000+ lines of dead and unsafe code** while improving security, performance and maintainability.
- Improved API performance and reliability; implemented observability with Grafana, Datadog and the ELK Stack.
- Evolved API contracts with frontend and cross-functional teams; reinforced quality through testing and peer reviews.

Roger Vilà

Senior Backend Engineer | Remote roles

PROFESSIONAL EXPERIENCE (CONTINUED)

Senior Programming Analyst | K-LAGAN

Aug 2017 - May 2022

- Architected and operated a distributed platform with **10+ Docker-based microservices**, orchestrated with Kubernetes in production.
- Built event-driven integrations with Apache Pulsar, AWS SQS and Redis Pub/Sub for scalability and fault tolerance.
- Used Laravel for secure API integrations and background tasks; Python for data pipelines and robotic process automation (RPA).
- Built and maintained Jenkins CI/CD pipelines, achieving **80% code coverage** measured in SonarQube.
- **Led remote teams across Europe and Asia**, conducting architecture reviews, code reviews and technical mentorship.

EARLIER EXPERIENCE

Full Stack Developer | Health Dataline Europe SA
Mar 2017 - Aug 2017

CEO & Co-Founder | SeeDoCare S.L.
Oct 2015 - Mar 2017

Software Developer | Emotion Experience
Nov 2016 - Feb 2017

Web Developer | Caravelo
Nov 2015 - Nov 2016

Web Developer | SIQUR S.P.A.
Apr 2015 - Nov 2015

Web Developer Instructor | CIPSA
Oct 2014 - Apr 2015

Web Developer | Mediterrani Food
May 2013 - Jun 2014

SELECTED OPEN-SOURCE WORK

Equipment - Maintain a Python scaffolding framework used in production, with configuration, storage, database connections, scheduled tasks and queue management.

PHP developer tooling - Published packages include Array Diff Multidimensional, Laravel Email Failer and PHP SonarQube Scanner.

AI agent skills - Maintain reusable skills to automate engineering workflows in personal projects.

EDUCATION

Web Development Master | CIPSA Barcelona | Sep 2013 - Jun 2014

BA, Music Theory and Composition | Conservatori Liceu | Sep 2010 - Jun 2014

BA, Composition | Sibelius Academy, Helsinki | Sep 2012 - Jun 2013
