

Roger Vilà

Senior Backend
Engineer

ABOUT ME

As a Senior Backend Engineer with over 12 years of professional experience, I design and deliver cloud-native backend systems and distributed architectures that power scalable, mission-critical applications. I have worked extensively with **AWS** and **Cloudflare** to build and operate secure, high-availability services, and I bring hands-on experience with **Kubernetes** for container orchestration and **Docker** for containerised workloads across both professional and personal environments.

My core expertise spans the design of **secure RESTful APIs** and **event-driven architectures** — using messaging systems such as Apache Pulsar, AWS SQS, and Redis Pub/Sub — as well as data modelling across relational databases (**MySQL**, **PostgreSQL**) and NoSQL stores (**MongoDB**, **Redis**). I have consistently delivered reliability improvements: maintaining a 99% SLA at Convelio, reducing tech debt and incidents by 20% at InfoPro Digital Automotive, and managing incidents with structured postmortem practices.

I am experienced with **observability and monitoring** tooling, including Grafana, Datadog, and the ELK Stack, and I apply SRE principles — incident prioritisation, man-day budgets for tech maintenance, and postmortem-driven improvements — to keep production systems stable and continuously improving. I have also worked with **Java** and contributed to CI/CD pipelines using Jenkins.

Throughout my career I have acted as a **technical leader and mentor**, guiding distributed remote teams across Europe and Asia, conducting design and code reviews, and raising engineering standards through automation, testing, and shared best practices.

Beyond my professional work, I actively contribute to **open-source software**. I maintain Equipment (<https://equipment-python.vercel.app>), a Python scaffolding framework used in production environments, and a collection of AI agent skills (<https://github.com/rogervila/agent-skills>) that I use to automate engineering workflows in my personal projects.

RESUME

Senior software developer | InfoPro Digital Automotive

September 2024 - Present | Barcelona

- Modernise legacy Java and PHP SaaS APIs deployed on AWS and Cloudflare, integrating data sources from multiple providers.
- Reduce tech debt and production incidents by 20% through systematic refactoring, tightened test coverage, and improved deployment practices.
- Manage incident response triaging by severity, estimating resolution timelines, and delivering structured postmortems to drive long-term reliability improvements.
- Mentor junior developers, conducting code reviews and sharing backend engineering best practices across the team.

Roger Vilà

Senior Backend
Engineer

Tech Lead | Wivapp.com

February 2024 – September 2024 | Barcelona

- Develop and maintain a scalable MVP solution for restaurants.
- Lead the development of a new product from scratch.

Senior Backend Developer | Convelio

May 2022 – February 2024 | Paris, France

- Design and maintain scalable, secure PHP-based APIs supporting a high-volume enterprise logistics platform, ensuring a 99% SLA.
- Collaborate with frontend engineers and cross-functional teams to design and evolve the platform's API contract.
- Optimise API performance, latency, and reliability; implement observability practices using Grafana, Datadog, and the ELK Stack.
- Continuously improve code quality and maintainability through rigorous testing, peer code reviews, and adherence to engineering best practices.
- Refactor and harden legacy code for security and performance; eliminated over 10,000 lines of dead and unsafe code.

Senior Programming Analyst | K-LAGAN

August 2017 – May 2022 | Barcelona

- Architect and operate a distributed microservices platform with 10+ Docker-based services, orchestrated with Kubernetes in production environments.
- Design and implement event-driven integrations using Apache Pulsar, AWS SQS, and Redis Pub/Sub, decoupling services for improved scalability and fault tolerance.
- Use Laravel for secure API integrations and background task processing; Python for data processing pipelines and RPA automation.
- Build and maintain Jenkins CI/CD pipelines, achieving 80% code coverage on SonarQube across the platform.
- Act as tech lead for remote engineering teams across Europe and Asia conducting architecture reviews, code reviews, and technical mentorship.

Full Stack Developer | HEALTH DATALINE EUROPE SA

March 2017 – August 2017 | Barcelona

- Adapt eCommerce websites creating new front-end versions for specific devices with Onsen UI. More than 10 client websites migrated.
- Create internal APIs to retrieve data from different data sources on the backend.
- Maintain and apply SEO to toopharm.com and healthdataline.com websites, increasing by 1% of new visits every month

CEO & Co-Founder | SeeDoCare S.L.

October 2015 – March 2017 | Barcelona

- Develop web applications tailored to our client's needs. 3 clients in the first year.
- Implement custom eCommerce, SaaS, and CMS solutions. 20% cost reduction compared to other B2B platforms.
- Integrate additional services like SEO, Brand design, and Marketing solutions.
- In 2017, the lack of big clients plus the job offer we found on the market made us take the decision to close the business and work full-time for other companies, which resulted in fewer work hours and more salary

Roger Vilà

Senior Backend
Engineer

Software Developer | Emotion Experience

November 2016 - February 2017 | Barcelona

- Develop an interactive space where the public can interact with the GFT brand directly.
- Create a specific software for each action, working with LED displays and interactive panels.
- Develop software for a specific setup for GFT called "GFT Lab" (<https://www.lightsoundgroup.com/portfolio/gft-lab/>).

Web Developer | (caravelo (

November 2015 - November 2016 | Barcelona

- Develop a product for Volaris Airline company called "Volado Volaris", which offered cheap trips with few hours in advance for planes with empty seats. First released after 1 month.
- Maintain product websites for Airline companies.
- Implement a design system to easily integrate new Airline companies into our products. 2 new airlines used it.

Web Developer | SIQUR S.P.A.

April 2015 - November 2015 | Italy

- Develop the Spanish version of the eCommerce website. 1-10 monthly products sold in the first year.
- Develop a WordPress blog as part of the marketing strategy. 1-2 posts every month by external collaborators.
- I also managed video editing, blog writing, SEO, analytics, and marketing campaigns.

Web Developer Instructor | Centro Informática Profesional CIPSA

October 2014 - April 2015 | Italy

- Hired as an instructor after finishing the Full Stack Web Design and Programming Master. More than 50 students in 1 year.
- Guide my students to grow up as developers, starting with a very simple HTML landing page and finishing the course with a big full-stack project.
- More than 50% of students found a job after finishing the course.

Web Developer | Mediterrani Food

May 2013 - June 2014 | Barcelona

- Develop and maintain 1 WordPress site.
- Blog writing, video editing, Community management, and SEO. More than 10 new clients thanks to that content.
- Apply the brand design to the website, reports, and communications.

EDUCATION

Roger Vilà

Senior Backend
Engineer

Master's degree, Web Development Master

September 2013 – June 2014

CIPSA Barcelona | Barcelona

Bachelor of Arts (B.A.), Music Theory and Composition

September 2010 – June 2014

Conservatori Liceu | Barcelona

Bachelor of Arts (B.A.), Composition

September 2012 – June 2013

Sibelius-Akatemia – Sibelius-Akademien | Helsinki

Associate's degree, Music Performance, General

September 2008 – June 2010

Conservatori Liceu | Barcelona
